

The completed form should be returned to: Microbiology Today Editorial Office, Marlborough House, Basingstoke Road, Spencers Wood, Reading RG7 1AG, UK

[Article Title]

[Main Author]

**Before signing this form, please read the notes overleaf, and check that you actually hold the copyright (see Note 2). Please make a copy of the form for your own records.**

*\*delete as necessary*

1. This work was done in my capacity as: an officer or employee of the US Government/an officer or employee of the British Government/other (please give the full name and address of the copyright holder)\*:

2. I/we\* certify that I/we/the body of which I am the authorized signatory\* own(s) the copyright in the above-mentioned article, which has not been published elsewhere, including publication on the World Wide Web, is not under consideration for publication elsewhere, and of which the copyright has not been previously assigned.

3. If the article is accepted for publication in *Microbiology Today*, then in consideration of the publication of the article, I/we/the body of which I am the authorized signatory\*:

- (i) assign(s) the present and/or future copyright in this article, throughout the world and in any form and any language, to the publisher (Society for General Microbiology); and
- (ii) agree(s) that the publisher may seek payment of fees by corporate bodies or individuals for the privilege of making copies of this article from the conventional printed form or from a form stored electronically, e.g. by on-line access or document-delivery services; and
- (iii) agree(s) to indemnify the publisher in respect of claims made against it by third parties for copyright infringement related to publication of the article, or concerning the authorship of the article or rights to publish the article.

This assignment applies only to the extent allowable by law.

4. I/we\* certify that:

- (i) the article is my/our\* original work, has not been published before and is not being considered for publication elsewhere;
- (ii) I/we\* have obtained permission for and acknowledged the source of excerpts from other copyright works (relevant permission correspondence should be attached to this form);
- (iii) to the best of my/our\* knowledge the article contains no statements that are libellous, unlawful or in any other way actionable.

5. I/we assert the moral right to be identified as the author(s) of the article\* (*see note 8 overleaf*)

The Society for General Microbiology is a Company Limited by Guarantee, Registered in England (no. 1039582). Registered Office: Marlborough House, Basingstoke Road, Spencers Wood, Reading RG7 1AE, UK. It is also a Registered Charity (no. 264017).

## COPYRIGHT: NOTES FOR AUTHORS

1. The magazine's policy is for the publisher (Society for General Microbiology) to acquire copyright in all articles published. This is because ownership of copyright by one organization tends to ensure maximum international protection for the author and publisher against infringement, libel or plagiarism. It also enables the publisher to provide for the widest possible dissemination of articles, and to deal efficiently with requests by third parties to reproduce an article, or part of it, in accordance with a general policy which is sensitive both to any relevant changes in international copyright legislation and to the general desirability of encouraging the dissemination of knowledge.

2. To assign copyright to the publisher, the form overleaf should be signed by the copyright owner(s) and returned to the Editorial Office. Where the copyright is held by a number of joint authors, the senior author may sign on behalf of co-authors who are not readily available provided that he or she holds written consent from such co-authors for the copyright to be assigned to the publisher; copies of such written consent should be sent with the completed form. **If the copyright is not owned by the author(s), e.g. where it is held by the author's employer, section 1 overleaf should be completed and the form should be signed by the copyright-holder's authorized agent.**

3. If copyright is held by the author's employer, the publisher requires non-exclusive permission to deal with requests from third parties to reproduce the article or parts of it; such requests will be dealt with as described in note 5 below.

4. In assigning your copyright you are not forfeiting your proprietary rights, including patent rights. Nothing in this agreement shall restrict your rights as the author(s) or, in the case of work written by an author in the course of his or her employment, the employer's rights, to revise, adapt, prepare derivative works, present orally or otherwise make use of the contents of the article. You may do this without seeking the publisher's permission, provided that the magazine is acknowledged as the original source. See note 7 below regarding electronic publishing.

5. All requests to reproduce your article, or a substantial part of it, in another publication in any form will be subject to your approval (which we will assume is given if we have not heard from you within four weeks of your approval being sought).

### 6. Photocopying

It is permissible to make a single photocopy of an article for the purposes of private study or research without seeking the permission of the publisher. However, **unlicensed multiple copying without permission is illegal**. The Society for General Microbiology participates in a number of photocopying licensing schemes, including those operated by the Copyright Licensing Agency (UK) and the Copyright Clearance Center (USA), non-profit-making organizations which offer centralized licensing arrangements for photocopying.

### 7. Electronic publication and storage

In addition to publication of your article in conventional printed form, your assignment of copyright also signifies your agreement to its publication and/or storage electronically. The publisher may also arrange to include your article in electronic document-delivery services and databases.

When your article has been published in the magazine, you may mount a PDF (portable document format) file of the published version of the article on your own or your institution's website if you wish. The PDF file must correspond exactly to the article as printed in the magazine. PDFs can be downloaded from the *Microbiology Today* website (<http://www.sgm.ac.uk>) or may be obtained from the publisher on request (a handling charge may be made). You must not mount your article on a server for the purpose of commercial sale or systematic external distribution by a third party (e.g. via an e-print server).

8. The UK Copyright, Designs and Patents Act 1988 requires that for an author(s) to acquire the right to be properly credited whenever the work is published (the 'right of paternity'), the author(s) must assert this moral right in writing.

9. All enquiries about copyright and requests to reproduce material published in the magazine should be sent to the Editorial Office.
